

PROTOCOL SUMMARY

COVID-19 MEASURES

EL REI DEL MAR

El Rei del Mar has implemented a health protocol to prevent COVID-19.

The protection measures implemented are in accordance with the protocols and recommendations of good practices issued by the main health authorities in the diving sector.

MEASURES TAKEN BY THE DIVING CENTER

1. The necessary tools have been enabled to make reservations and administrative procedures in advance and by electronic means. It is recommended to pay in advance or by card.
2. All staff members have received specific training and have the necessary and appropriate protections.
3. Facilities and boats have a limited capacity, indicated at the entrance. For this reason, we prioritize the entry to the divers.
4. The facilities are ventilated continuously or with the appropriate periodicity.
5. In the dive center there is, available to users and staff, hydroalcoholic gel at various points. It must be used before accessing each installation and regularly.
6. The dive center has implemented a specific cleaning and disinfection system for surfaces, equipment and rental gear.
7. Signs and signage have been installed in all facilities and equipment.

MEASURES FOR USERS

1. Each user must read and accept the prevention measures of our diving center.
2. The mask must be used at all times, before and after going underwater. For this reason, each user must bring their own mask.
3. Do not come accompanied. Respect this limitation and follow the instructions of our staff.
4. We cannot greet each other with contact. Respect the safety distance with our staff and with other users in all facilities.
5. Carry a backpack to store all your personal items to keep them protected and help keep the boat tidy. We will not be able to provide you with water, remember to bring your own bottle to maintain good hydration.
6. In case of renting material, we will deliver the material properly disinfected before each dive. After the activity, you must give it to our staff to proceed with the disinfection, following the required protocols.
7. If you bring your own equipment, we will provide you with a plastic box, disinfected, so that you can carry all your material. The mask and regulator must be closed and protected * in a waterproof bag that you must carry. *

* We will disinfect the low-risk material by spraying. By isolating the mask and the regulator, the parts of the equipment in direct contact with the mucous membranes and the respiratory tract, we protect you from the possible contagion or intoxication by harmful products.

This material will not be treated by our staff.

Follow the instructions of our staff at all times, they will be attentive to everything you may need to make your experience as pleasant as ever and enjoy a well-deserved dive.

Thank you for your collaboration.

BONUS EXTRA CHECK LIST

DO NOT FORGET ANYTHING

This checklist is only intended to help you prepare everything you need to come and dive with us. Please do not print it.

Please bring strictly necessary items and transport them properly.
Items marked * are required.
